DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jackson (US Patent Application Publication 2002/0068973).

Jackson discloses all of the claimed structure of the current application (see **Figures 1-7**) except for the device being made from a biologically inactive metal (claims 1, 13, 14), biologically inactive non-metal (claims 15, 27, 28), biologically active bone-based material (claims 29, 41, 42), or a non-bone based material (claims 53, 55, 56).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the device of Jackson from a material such as a biologically inactive metal, biologically inactive non-metal, biologically active bone based material, or a biologically active non-bone based material since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.
